EDUCATION

2019	Full Stack Web Development Certification Carolina Code School Greenville SC
2017	Master of Business Administration Salem International University Salem, WV
2012	Bachelor of Science in Early Childhood Education Mount Olive College Washington, NC
2009	Associate of Arts Pitt County Community College Winterville, NC

WEB DEVELOPMENT GRADUATE

Carolina Code School is a 12-week coding bootcamp where we specialized in immersive training centered on language fluency, object-oriented programming, and project based learning. Here are a couple projects that I worked on.

Pet Space - Final Project - Python, Django, React, HTML, CSS, JavaScript

This was a large-scale, full-stack, responsive application. I used Python with Django framework to build most pages including the landing page, accounts signup and login to accounts authentication, QR codes, owner's dashboard and the pet's individual pages. JavaScript was used to set a time out on certain pages and intergrade Google maps. To update the account holders information, I used React to show the current information along with the updated information being typed in. The purpose of this project is to help lost pets find their owners. I generated QR codes for each pet's page.

Chat App - Django, REST, HTML, CSS, JavaScript, jQuery

I created a full stack web application comprised of jQuery and Django REST framework. Django REST framework was used for creating an API and jQuery was used from perform AJAX requests to retrieve JSON from my API.
